

## Why You Should Attend

In addition to informing you of the latest information on environmental requirements, This program will provide you with a consulting contractor's view of a large project where he developed a constructability plan that complied with the regulations of the state the project was located in. This was successfully

accomplished by utilizing non-structural Best Management Practices. By attending the program, you will benefit from his experience by learning techniques that can be applied to your projects to make them more successful.

## Who Should Attend

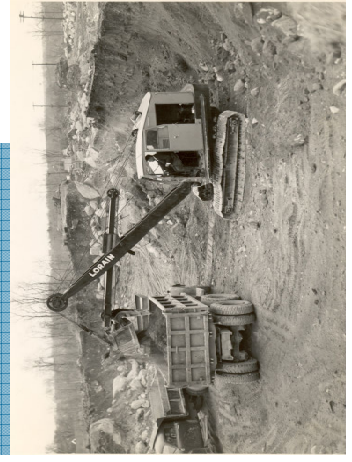

Developers, contractors, engineers, consultants, mortgage lenders, state and local officials, attorneys, architects, bonding companies, material suppliers and NRCS/SWCD staff.

## OVERVIEW

The Maine Nonpoint Source Training and Resource Center in cooperation with John W. Deering, founder Earth Management: The Team Concept<sup>®</sup>, and the Associated General Contractors of Maine has put together a one-day course on non-structural best management practices. The program as presented will discuss all of the non-structural best management items that are part and parcel to the structural items during the planning and design of a major construction site. This program will meet the due diligence and standards of care with reference to the Spearin Doctrine 1918.
